Short Description

In "Energy in Business - Simple Rehab/Physical Therapies for Dogs," the author delves into the concept of energy as a key factor in business success. Drawing inspiration from dogs and their innate ability to exude enthusiasm and joy, the author proposes an equation: $\text{Energy} = \text{Joy} + \text{Enthusiasm} + \text{Activity}$. Through this equation, the book suggests that finding joy in what one does is crucial for achieving success, whatever that may mean to each individual.

Description

The eBook focuses on the rehabilitation and physical therapies for dogs, highlighting how observing our canine companions can provide valuable insights into understanding success. By increasing a dog's range of motion and ease of movement, their energy and activity levels are enhanced. To facilitate this, the author introduces an animal massage course conducted annually, catering to various audiences, including clients, veterinary students, veterinarians, breeders, and pet owners.

The author, who runs Animal Wellness, shares their experiences with the rehabilitation

side of their practice, often witnessing remarkable transformations in mobility. They refer to this as the "Jesus factor," where energy medicine intervenes and enables paralysed patients to walk after just one session. Exploring alternative treatments such as acupuncture, essential oils, remedial massage, laser therapy, herbal remedies, diet changes, orthomolecular supplements, and homeopathy, the author highlights their effectiveness and lasting benefits compared to traditional medications.

Throughout the eBook, the importance of energy balancing and structural work is emphasized, not only benefiting the patients but also creating a ripple effect of joy for owners and staff members. The book also emphasizes the significance of active owner participation in a dog's rehabilitation, offering simple yet effective therapeutic exercises. These exercises include hill work to strengthen hind limbs, sit-to-stands for quadriceps and hamstrings, cavalettis for joint mobility and proprioception, wobble boards for core strengthening, weaving for spine flexibility, treadmills and water walking for overall fitness, and gentle pressure touches to improve core strength.

In addition to providing practical advice and techniques for dog rehabilitation, the eBook emphasizes the special bond between humans and their four-legged friends. Dogs' ability to greet their owners with unparalleled enthusiasm and joy, even after a short absence, serves as a reminder of the energizing power of connection. The author encourages readers to support charities like "Pets in the Park," highlighting the importance of giving back and finding joy in helping others.

"Energy in Business - Simple Rehab/Physical Therapies for Dogs" serves as a comprehensive guide for business owners, pet owners, veterinarians, and anyone interested in fostering positive energy and well-being. By incorporating the lessons learned from our canine companions, readers can enhance their own energy levels, find joy in their endeavours, and create a thriving business and personal life.
